Systems & Cloud Administrator with hands-on experience in Microsoft 365, cloud technologies, cybersecurity, and infrastructure automation.

🧠 Core Skills

Cloud & Microsoft

Intune
Entra ID
Azure
Defender
Autopilot

Infrastructure

Windows Server
VMware
Nutanix AHV
Active Directory

Linux & Automation

Ubuntu | Rocky Linux
Docker | Kubernetes
Ansible
Terraform

Security

Darktrace
MFA
DRP / BCP
Hardening

📁 Professional Experience

Schroeder & Associés

Cloud & Infrastructure Administrator

10/2023 – 09/2026 | Luxembourg

- Administered Microsoft 365 services for over 600 users, including Azure, Intune, Entra ID and Exchange Online.
- Administered an infrastructure of approximately 50 physical servers and 250 virtual machines distributed across multiple datacenters running on Nutanix AHV.
- Administered PostgreSQL, MySQL, and Microsoft SQL Server database clusters.
- Managed identity and endpoint security through Microsoft Intune, Entra ID, Conditional Access, and MFA enforcement.
- Administered and monitored the Darktrace cybersecurity platform and Microsoft Defender security solutions.
- Implemented cybersecurity initiatives including MFA deployment, automated security monitoring workflows, and endpoint hardening aligned with ANSSI and CIS recommendations.
- Contributed to the design and implementation of disaster recovery and business continuity solutions.
- Participated in the modernization of Windows deployment processes and the migration of legacy services to containerized and datacenter-hosted platforms.

Préfecture de Moselle - Ministère de l'intérieur

IT Technician in Work-Study Program

09/2021 – 08/2023 | Metz, France

- Provided on-site IT support and technical assistance to end users across the region.
- Participated in the migration of a Hyper-V infrastructure to a VMware vCenter cluster.
- Monitored servers and infrastructure performance using Zabbix.

📁 Technical Projects

Enterprise Backup Infrastructure

- Deploying a Veeam Backup & Replication infrastructure leveraging hardened repositories on Rocky Linux.
- Implementing immutable backup storage to improve ransomware resilience.
- Integrating LTO-9 tape libraries for long-term archival and disaster recovery.
- Designing backup retention and recovery procedures aligned with business continuity requirements.

Secure Windows Deployment Platform

- Designing an automated Windows deployment solution based on Windows Autopilot.
- Automating workstation provisioning through PowerShell-based deployment workflows.
- Implementing Windows hardening measures based on ANSSI and CIS recommendations.
- Disabling legacy protocols such as SMBv1, LLMNR, and NetBIOS to reduce attack surface.

 Certifications

 CCNA - ENSA  Cisco	14/01/2025
 Certified Stormshield Network Administrator (CSNA)  Stormshield	13/11/2024
 CCNA - SRWE  Cisco	31/07/2023

 Academic Background

Cybersecurity and Networks Expert (Master's degree) Campus Mewo 	10/2024 – 07/2026 Metz, France
Systems and Networks Administrator (Bachelor's degree) Campus Mewo 	09/2023 – 07/2024 Metz, France

 Languages

French Native	English C1 - TOEIC Score of 910	German A1
